TECHNICAL SHEET

768

Dimensions (mm)	Width 1400 x Depth 1050 x Height 1500
Weight (kg)	200
Electric Power (v)	380 Three-phase + Neutral + Ground
Installed Power (kw)	3.5
Air Pressure Feeding (bar)	6.0
Air Pressure Consumption (liters/min.)	120
Performances	About 450 containers per hour by Single Format. 900 by Double Format.

Data are approximate because the actual performances may depend on the container material, the container dimensions, type of food (solid, liquid, creamy, pasty), the degree to compatibility to heat sealing between film material and container material.

768VG

Dimensions (mm)	Width 1400 x Depth 1050 x Height 1500
Weight (kg)	300
Electric Power (v)	380 Three-phase + Neutral + Ground
Installed Power (kw)	5.0
Air Pressure Feeding (bar)	6.0
Air Pressure Consumption (liters/min.)	240
Performances (Sealing Only)	About 450 containers per hour by Single Format. 900 by Double Format.
Performances (M.A.P.)	About 370 containers per hour by Single Format. 740 by Double Format.

Data are approximate because the actual performances may depend on the container material, the container dimensions, type of food (solid, liquid, creamy, pasty), the degree of compatibility to heat sealing between film material and container material, the oxygen remaining inside the thermo-welded container after the end of the whole process.
